

Aquarium Water Piping

Application: Filtration and treatment of lake water for Amazon aquarium 50-60 psig operating pressure at 72°F

Location: Milwaukee County Zoo - Milwaukee, Wisconsin

Product: 8"-12" Red Thread Pipe and Fittings - Over 2,500 bell & spigot and flange joints in the system

Features & Benefits: Close tolerance capabilities of the system achieved accurate makeup lengths, an important feature in tank valve and header hookups.

Lightweight and ease of handling piping aided installation in tight work areas.

Fiberglass piping does not contaminate the treated water as metallic pipe would.
