

Industrial Waste Piping

Application: Sodium hydroxide and de-inking process waste discharge to a treatment plant

Location: Wisconsin Tissue Mills - Menasha, Wisconsin

Product: More than 1/2 mile of Green Thread®, Big Thread®, and Poly Thread® pipe and hundreds of fittings.

Features & Benefits: Piping provided high strength, durability and superior corrosion resistance in caustic applications. Fiberglass pipe is a cost effective alternative to 316 stainless steel.

Adhesive joints eliminated the need for welding equipment.
