

## Chilled Water Supply & Return Piping

Application: Chilled water supply and return renovation

Location: College in St. Louis, Missouri

Product: Approximately 2,500 feet of 4"-16" Red Thread® II pipe and fittings

Features & Benefits: Unlike steel, the flow characteristics of fiberglass do not degrade over time. Fiberglass pipe requires less pump horsepower for reduced capital and energy cost.

The lightweight of fiberglass requires less manpower and is easier to install in difficult locations.

The system was designed to comply with seismic Zone 3 earthquake conditions.
