

## Process Waste Stream (Semiconductor)

Application: Transport of acid waste streams from the process facility to the on-site wastewater treatment system

Product: Centricast® CL and F-Chem® vinyl ester cast pipe and fittings

Features & Benefits: The varying nature of the acid waste stream requires a product that is resistant to a wide variety of corrosive fluids. The versatility of the CL system, as well as the ease of installation, made the products an outstanding choice for this application.
