

Wastewater Treatment Piping

Application: Siphon piping transporting municipal waste sludge to multiple large clarifiers

Location: Cleveland, Ohio

Product: Approximately 9,000 feet of Centricast® RB epoxy cast pipe and related fittings, 6" and 8" diameters

Features & Benefits: Much of this pipe is suspended from high trestles. The piping's light weight, robust design, easy installation, and superior support spacing were key factors influencing the customer's decision to use the RB product. Strong local and factory support was another important factor in the decision.
